**Title:** Puffin PROTECTORS: Scientists spent last summer counting puffins to see how they are responding to climate change. By: Tweed, Katherine, Scholastic Math, 01988379, 1/15/2018, Vol. 38, Issue 6**Database:** MasterFILE Premier

## Puffin PROTECTORS: Scientists spent last summer counting puffins to see how they are responding to climate change

### Contents

[TREKKING NORTH](#)[SNACK TIME](#)[A CALL TO ACTION](#)[FINDING MEAN, MEDIAN, AND MODE](#)[YOUR TURN](#)

Listen

American Accent

They call themselves "puffineers." This group of intrepid researchers trekked to the northernmost point of Scotland last May to count puffins. Their goal: to see how the puffin populations are doing in the face of **climate change**.

After years of being a species of least concern, puffins were upgraded to vulnerable in 2015 -- the first step on the way to an endangered species. The Royal Society for the Protection of Birds estimates that puffin numbers across the U.K. and Europe have plummeted in recent years.

But no one really knows for sure how much puffin numbers have decreased. The last full census of seabirds in the U.K. was in 2000. There have been occasional counts since then, but nothing that paints a clear picture of

## EBSCOhost Research Databases

EBSCOhost is a powerful online reference system accessible via the Internet. It offers a variety of proprietary full text databases and popular databases from leading information providers.

The comprehensive databases range from general reference collections to specially designed, subject-specific databases for public, academic, medical, corporate and school libraries.

[View A Tutorial On This Topic >>](#)

### EBSCO Support Site

EBSCO's [Support Site](#) is available 24 hours a day, 7 days a week. Our FAQ database, [tutorials](#), and user guides can provide answers to your technical questions.

EBSCO Customer Support Representatives are also available by [phone](#) and [e-mail](#) 24 hours a day, Monday through Friday, as well as Saturday and Sunday from 9 a.m. to 5 p.m. (US EST).

### How to Use Help

- When the Help icon  appears, you can click the icon and help for the screen you are on will display.
- To obtain help for the database(s) you are searching, click the Help icon  to the right of the Find field and click on the Database name at the bottom of the left-hand side of the Help window. Database help is also available from the Choose Databases window.
- To view the entire Help System, click the [Help](#) link at the top right-hand corner of the screen.

**Note:** The recommended screen resolution for EBSCOhost is 1024 x 768.

FINDING MEAN, MEDIAN, AND MODE

YOUR TURN

endangered species. The Royal Society for the Protection of Birds estimates that puffin numbers across the U.K. and Europe have plummeted in recent years.

But no one really knows for sure how much puffin numbers have decreased. The last full census of seabirds in the U.K. was in 2000. There have been occasional counts since then, but nothing that paints a clear picture of puffin health.

Enter the puffineers, who are part of the Project Puffin (UK), supported by Heritage Lottery Fund in Scotland. It brings together on-the-ground researchers, technology like GPS trackers, and citizen scientists to understand the threats puffins face. "It's a big fact-finding mission," says Georgia Longmoor. She's one of this summer's puffineers and a Ph.D. student studying animal communication at the University of Edinburgh in Scotland.
